PEER REVIEW

About Peer Review

The Campbell Clinic aims to provide a Peer Review group for discussion of like-minded practitioners, to allow collaboration and idea-sharing to make things better and receive verifiable CPD in the process.

The mission statement of The Campbell Clinic is to positively influence the lives of as many people as possible through the work we do and the example we set and the peer review is part of this.

The Campbell Clinic supports peer review groups for general dental practitioners, young dentists, hygienists and practice managers and all are welcome at all meetings. If you're interested in more information about these, please get in touch with us.

ITI STUDY CLUBS

.....

About ITI Study Clubs

The ITI Study Clubs offer a unique and engaging platform for dental professionals to connect, collaborate, and grow in their field. Organised by the International Team for Implantology (ITI), these clubs provide a local, small-group learning environment where participants can share knowledge, discuss cases, and explore the latest advancements in implant dentistry. Designed to foster peer-to-peer learning, each session features interactive case studies, expert insights, and hands-on opportunities.

With a strong emphasis on evidence-based practices, ITI Study Clubs are ideal for professionals at all levels. The Nottingham ITI Study Club, in particular, is thrilled to announce an exciting lineup of speakers for 2025, including the renowned Maja Chmielewska and Alberto Monje, who will bring their expertise and insights to the sessions.

By joining, members gain access to a supportive community, exclusive ITI resources, and the chance to deepen their expertise while building lasting professional relationships. Whether you're looking to refine your skills or expand your professional network, ITI Study Clubs offer an invaluable opportunity to enhance your practice in a collaborative and inspiring setting.

DIGITAL PLANNING AND GUIDED SURGERY

With Maja Chmielewska

Alberto Monje

HOW TO SUCCEED IN THE TREATMENT OF PERI-IMPLANTITIS

.....

Don't miss the opportunity to attend a lecture by Dr. Alberto Monje, a renowned expert in peri-implant disease. With a wealth of experience from top institutions and a deep understanding of bone architecture, Dr. Monje brings cutting-edge insights that will elevate your practice.

Join us at The Campbell Clinic for an engaging and informative session that promises to be both enlightening and inspiring.

27th February 2025

The Campbell Clinic, Nottingham

Beatriz Sanchez & Dominic Smithers

MASTERING RIDGE PRESERVATION: PROTOCOLS, TECHNIQUES, AND LIVE SURGERY

.....

Join us for an exclusive ITI Study Club on Ridge Preservation at The Campbell Clinic, where you will gain invaluable insights from an expert with extensive experience in the field. This session will cover a range of essential topics, including:

- The Campbell Clinic Protocols: Learn the latest protocols for ridge preservation, including detailed indications and contraindications, to ensure successful outcomes.
- Atraumatic Extraction Techniques: Discover advanced atraumatic extraction techniques that minimise bone loss and enhance the success of ridge preservation.
- Live Surgery Demonstration: Watch a live surgical demonstration, offering a real-time view of ridge preservation techniques and the application of key protocols.
- Re-entering Ridge-Preserved Sites: Gain a deeper understanding of how to effectively re-enter ridge-preserved sites following the healing phase, ensuring optimal results in implant placement.

23rd April 2025

The Campbell Clinic, Nottingham

Promethean Dental Lab

ENHANCING DENTIST-LAB COLLABORATION:
GUIDED IMPLANT PLANNING, ABUTMENT SELECTION
AND WORKFLOW

.....

This event will cover the following key topics:

- Effective Communication with the Lab: Explore how effective communication between the clinician and lab plays a vital role in achieving precision and successful outcomes in guided implant procedures.
- Pre-Planning Requirements from the Clinician: Learn what essential information and preparation the clinician needs to provide to the lab prior to the planning process to streamline the workflow.
- Live Planning of an Implant and Prosthesis: Watch a live demonstration of implant planning, focusing on the critical steps involved in setting up the treatment plan, abutment and material selection for predictable execution.
- Guide Printing and Finishing Process: Discover how Promethean prints and finishes surgical guides, ensuring they meet the needs of both clinician and patient.
- Understanding the Drill Guide Pack: A comprehensive walk-through of the drill guide pack provided by Promethean.

10th July 2025

The Campbell Clinic, Nottingham

Maja Chmielewska

DIGITAL PLANNING AND GUIDED SURGERY

.....

Take the first step into the world of guided surgery with our comprehensive session on digital planning using CoDiagnostix. This event is designed to equip you with the skills and knowledge to seamlessly integrate digital workflows into your practice.

Topics include:

- Digital and Analog Planning: Understand the principles and benefits of both approaches.
- Setting Up CoDiagnostix: Learn the basics of this powerful digital planning tool.
- Case Planning: Explore step-by-step methods for planning implant cases with precision.
- 3D Printing and Guided Surgery: Discover how to bring your plans to life with 3D printing and implement them through guided surgery.

DENTISTRY LIVE

About Dentistry Live

Dentistry Live is a premier webinar series that broadcasts live clinical cases from The Campbell Academy, featuring leading UK clinicians. Each month, it offers dental professionals the opportunity to observe real-time procedures, enhancing their clinical skills and knowledge. They also offer the convenience of earning Continuing Professional Development (CPD) hours.

The series covers a diverse range of topics, including implant surgery, root canal treatments, restorative treatment, and orthodontics.

For select Dentistry Live webinars, attendees have the option to participate in person, offering an enhanced learning experience. These in-person events include exclusive features such as:

- Pre-Webinar Case Discussion: Gain deeper insights into the clinical details and decision-making processes before the live broadcast.
- Face-to-Face Q&A: Engage directly with the presenting clinicians to ask questions.
